TRANSPORTING LIVESTOCK ACROSS AMERICA SAFELY ACT

- Increases the exempt air miles from the current 150 to 300.
- Increases the current driving time from the current 11 hours to not less than 15 and no more than 18 hours.
- Grant flexibility for drivers to rest when they need to without counting against the hours of service time.
- If a driver comes within 150 air miles of their delivery point, they may continue to finish their delivery regardless of hours of service.
- After the drive is completed a driver will rest for 10 hours if hours of service are 15 hours of driving time and for 13 hours of hours of service driving time is 18.

MODERNIZING AGRICULTURAL TRANSPORTATION ACT

- Requires the Secretary of Transportation to establish a working group to
 - Identify obstacles to the “safe, humane, and market-efficient transport of livestock, insects, and other perishable agricultural commodities” and
- Within 120 days of receiving the working group’s report, the Secretary is to propose regulatory changes, taking into account the findings and recommendations of the working group.
- The bill would suspend the provisions of 49 U.S.C. § 31137(a) – (f) as it would apply to commercial motor vehicles (CMV) hauling livestock, insects, or perishable agricultural commodities until the date on which the Secretary proposes regulatory changes
